Application No.: 10/559,810

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

- 1. (currently amended): A fluorine-containing polymer for masonry treatment, comprising:
 - (A) repeating units derived from a fluorine-containing monomer of the formula:

$$\begin{array}{ccc}
O & X \\
Rf-Y-O-C-C-C=CH_2
\end{array} (I)$$

wherein X is a fluorine atom, or a chlorine atom;

Y is an aliphatic group having 1 to 10 carbon atoms, an aromatic or cycloaliphatic group having 6 to 10 carbon atoms, a ${}^{-}$ CH₂CH₂N(R^1)SO₂- group (in which R^1 is an alkyl group having 1 to 4 carbon atoms) or a ${}^{-}$ CH₂CH(OY 1)CH₂- group (in which Y^1 is a hydrogen atom or an acetyl group); and

Rf is a linear or branched fluoroalkyl or fluoroalkenyl group having 1 to 6 carbon atoms, or a fluoroether group having totally 1 to 200 repeating units selected from the group consisting of the repeating units: $-C_3F_6O_-$, $-C_2F_4O_-$ and $-CF_2O_-$, and

- (B) repeating units derived from a monomer having a functional group reactive with active hydrogen, wherein the functional group is a silane group, and
- (C) repeating units derived from a fluorine-free alkyl group-containing monomer which is alkyl (meth)acrylate.
 - 2. (canceled).

AMENDMENT UNDER 37 C.F.R. § 1.116 Attorney Docket No.: Q91902

Application No.: 10/559,810

3. (original): The fluorine-containing polymer according to claim 1, wherein the monomer having a functional group reactive with active hydrogen (B) is a silane compound having a carbon-carbon double bond.

- 4. (canceled).
- 5. (canceled).
- (withdrawn): A composition for treating a masonry, which comprises the fluorine-containing polymer according to claim 1, and an organic solvent.
- 7. (withdrawn): A method of producing a treated masonry, which comprises applying the composition according to claim 6 to a surface of a masonry, and then eliminating the organic solvent.
 - 8. (withdrawn): A masonry produced by the method according to claim 7.
- 9. (previously presented): The fluorine-containing polymer according to claim 1, wherein, in the monomer (A), the Rf group is the linear or branched fluoroalkyl or fluoroalkenyl group having 1 to 6 carbon atoms.
- 10. (previously presented): The fluorine-containing polymer according to claim 1, wherein the monomer (C) is alkyl (meth)acrylate wherein the number of carbon atoms in the alkyl group is 1 to 18.
- 11. (previously presented): The fluorine-containing polymer according to claim 1, wherein the amount of the monomer having a functional group reactive with hydrogen atom (B) is from 0.01 parts to 50 parts by weight, and the amount of the fluorine-free alkyl group-containing monomer (C) is from 1 to 100 parts by weight, based on 100 parts by weight of the fluorine-containing monomer (A).

Attorney Docket No.: Q91902

AMENDMENT UNDER 37 C.F.R. § 1.116 Application No.: 10/559,810

12. (currently amended): A fluorine-containing polymer for masonry treatment, consisting of:

(A) repeating units derived from a fluorine-containing monomer of the formula:

$$\begin{array}{ccc} & & X & \\ Rf-Y-O-C-C-C=CH_2 & & & (I) \end{array}$$

wherein X is a fluorine atom, or a chlorine atom;

Y is an aliphatic group having 1 to 10 carbon atoms, an aromatic or cycloaliphatic group having 6 to 10 carbon atoms, a -CH₂CH₂N(R^1)SO₂- group (in which R^1 is an alkyl group having 1 to 4 carbon atoms) or a -CH₂CH(OY¹)CH₂- group (in which Y^1 is a hydrogen atom or an acetyl group); and

Rf is a linear or branched fluoroalkyl or fluoroalkenyl group having 1 to 6 carbon atoms, or a fluoroether group having totally 1 to 200 repeating units selected from the group consisting of the repeating units: -C₃F₆O-, -C₂F₄O- and -CF₂O-, and

- (B) repeating units derived from a monomer having a functional group reactive with active hydrogen, wherein the functional group is a silane group, and
- (C) repeating units derived from a fluorine-free alkyl group-containing monomer which is alkyl (meth)acrylate.
